1024 AJAX CMS

Hits: 8,345

Description: Version 1.4.4 Released!

The 1024 CMS is an PHP, AJAX integrated dynamic content management with built in support for news articles, download areas, member membership and discussion forums. The 1024 System is completely free so please feel free to download it and get started.

Whether you need a download area for your products, a forum to build a community or simply a web site with a news area the 1024 can cater for all your needs. You specify what pages are active, who can access what and further you can build member groups, administration users and specify how the web site works. From detailed statistics to reported objects management, the 1024 system provides all the data you need to customise and control your web site. Got users with different languages? No problem, simply modify the language packs are you're sorted.
