The GutterStar.net RSS Service

Hits: 1,691

Description: By using our RSS Script Generator, you can create a fully customized RSS feed script for your website using any valid RSS URL on the web. When you license one or more of your domains with the GutterStar.net RSS Service, you will be able to fully customize the RSS templates for each of your domains using your Domain License Control Panel, which provides an integrated template editor, usage instructions, and a full index of the dynamic variables that are available for use within your domain templates. Benefits include: Full customization of the RSS templates for your website, allowing you to directly change the HTML code for each template using your Domain License Control Panel. An automatic courtesy notification if the GutterStar.net RSS Service detects that an error has occurred with any of your RSS feeds at runtime. Lighter bandwidth usage for your website, since all RSS feed content (including images and media content) is automatically downloaded beforehand...

I thought this would be unusable for my own web page as others I have tried. This was terrific. Flexible customization, and I was able to add the feed content that I write to my main site now without others having to suscribe to a feed reader. I was more than pleased that this script delivered.
