byteCommerce

Hits: 757

Description: byteCommerce is the easiest way to sell your digital goods online, such as shareware software, MP3s, videos, e-books and any other type of files. You add your product to our catalog by filling in some information such as the product's title, price, files it includes, and optionally specify discount codes and serial codes (useful if you're selling shareware programs that need to be registered); then you add to your site an HTML link which we generate and you're done! When your customers are redirected to byteCommerce, we handle the electronic payment through PayPal. You immediately get your money on your PayPal account, and the customer can download the purchased files and/or get the registration codes from a secure page hosted by byteCommerce. Highlighted features:

- * No fixed monthly fee and no per-order commission
- * Support for serial codes and downloadable files
- * Support for discount coupons
- * Support for 16 currencies
- * Powerful reporting
- * Newsletter Management
