PukeHead Programming's Content Manager

Hits: 1,345

Description: PukeHead Programming Content Manager is a simple and effective website in a zip file. In this first complete Version release May 2008, we've added comprehensive hitdata, contact us and improved SEO components. It's still easy to drive and I like to use the site for ebooks. The script is designed to get you up and running as quick as possible. Too many content management systems need diploma to run them. If you are looking to build multiple sites, or just want a solution that will be up and running today this is the one for you. Written in PHP and requires mysql. This site is bundled with a WYSIWYG editor for your content fields to make editing your site easy.

Resource Specifications

Version:	1.0
Platform(s):	linux
