ASP Mailing List System

Hits: 1,765

Description: ASP Mailinglist System Version 2.1 has been released today. All known bugs were fixed and WYSIWYG HTML Editor added in this version. This ASP Mailinglist application allows you to easily manage and send news letters to the subscribers. You can send different news letter to different level of subscriber. The Administrator has full rights to add/edit/delete and other control panel features while the Moderator can add/edit/delete the subscriber accounts and can edit his/her own account. Other new features including online display settings and compact db, etc. are added in this version.
