Add authentication to your PHP pages the easy way

Hits: 2,745

Description: This will enable you to add a login prompt that authenticates a user before he can see a page.

No need to modify your code or pages. Simply download a file, and add a single line at the top of the page you want to add a login to.

Any feedback is appreciated.

Resource Specifications

Version:	1.01
Platform(s):	linux, windows, freebsd, sun
