AtomicEmail

Hits: 1,744

Description: Ever wanted to have your own email service similar to Gmail or Hotmail? With AtomicEmail you can, all you need is a web server with cPanel and CURL running on it. In a matter of minutes you will be ready to start allowing your users to create email accounts using your domain name.

The script is easily customizable, allowing you to change the quota for the email accounts and the design of the forms. Why pay for things you can get for free?

Resource Specifications
