Gig Guide / Event Lister

Hits: 2,503

Description: PukeHead Programming recently had to add a Gig Lister (GigGuide) to PukeHead, so here's the autonomous version of it. With this event calendar you can configure all text for forms in one config file. It's simple to install, uses one MySql table, with easy to use simple features. Admin can submit Events and users can submit events, you'll be able view, edit, delete or approve those listings.

Resource Specifications

Version:	1.0
