Flash Image Scroller

Hits: 7,947

Description: A simple, configurable image scroller for embedding in your webpages. Currently only supports horizontal scrolling, but offers many features such as auto-scrolling, infinite loop, mouseover effects (glow, shadow & zoom), supports any thumbnail size, colours of background panel, nav links and thumbnail backgrounds, randomization of image order, a choice of XML or query string based source file and even passing the thumbnail information to javascript when a thumb is clicked. Free for download under the GNU public license.

Resource Specifications
