Reading & Updating Content of a file

Hits: 613

Description: This script shows an example of a counter being incremented every time the page is loaded.

This is achieved by reading a file line by line using the fgets function and extracting the 2 fields (one for the date one for the counter). The file is then being updated.

There is a live example.

Resource Specifications

Version:	1.0.0
Platform(s):	linux, windows, freebsd, osx, sun
Date Added:	May 17th, 2007
Last Updated:	May 17th, 2007
Author:	linkstraffic

Average Visitor Rating:  **4.50** (out of 5)
