Difficult to work with and substandard grammatical errors., Sep 10th, 2000

Reviewed By: Mike2112

Difficult to work with. Grammar is substandard with lots of grammatical errors throughout the program. Flash also includes numerous grammatical errors.

Documentation is difficult to understand. Footer file does not function as it should making it difficult to blend the program with site content.

Overall, it's a very poorly organized and written program. The only plus are the various card graphics which are not bad although a little out of date.

Very Nice Script And It Works!, Dec 7th, 2000

Reviewed By: jjonesphd

Script is easy to work with, does what it was designed to do, and customer support is very good. If you have a problem with the script you are an email away from help. I have found that I have an answer to my email for support within a couple of hours.

happy to buy @Card ME, Sep 23rd, 2001

Reviewed By: perlman

Before finding @Card ME at Hotscripts.com, I've searched for many postcard scripts at CGI-Resources. I literally fell in love with @Card ME. It includes all kinds of nice features. I'm happy to have bought it. Not only is it easy to install, but @Card ME is also user friendly. If you are looking for a unique postcard script, I strongly recommend @Card ME.
