Miniweb 2.0 Blog Writer

Hits: 9,670

Description: Why host your own blog when there are so many free ones out there? There are two reasons: (1) Brand your site more effectively and (2) Drive traffic to your own site instead of the blog provider site. Miniweb 2.0 Blog Writer is designed for business blogging. Some of its popular features include: HTML editor, image postings, multiple blog categories, history links, site links, adjustable menu options, customizable style settings, email and text alerts, membership program, data backup, RSS/Atom syndication, tagging, and Google Gadgets. Miniweb 2.0 Blog Writer can be used as a standalone module or integrated with other Miniweb 2.0 modules: Calendar, Classified Ads, Directory, FAQ Manager, Form Maker, Forum, Guest Book, Help Desk, Job Board, Media Album, Online Store, Publisher, Site Search, and Survey Pro. Try out the demo to see for yourself how it can contribute to your business growth!

Resource Specifications
