Simple PHP powered text counter

Hits: 525

Description: A counter is an essential part of a site to know how many people are coming to site. Here is an easy way to make a counter. All you need is access to PHP and be able to chmod a directory. We're going to save the amount of hits in a .dat file, so you don't even need a mySQL database. First off, you have create a directory and CHMOD it 777 so PHP can write the counter.dat file.

Resource Specifications

Version:	1.0
Platform(s):	linux, windows, freebsd, osx, sun
Date Added:	Jun 14th, 2007
