Karamasoft UISuite - ASP.NET Components and Controls

Hits: 358

Description: UISuite is a value package including all of our AJAX-enabled ASP.NET components. This unique set of components will help you simplify ASP.NET development, reduce development time and cost, and build professional-grade applications in no time. Let your users enjoy a richer user interface, navigate your website without getting lost, and search your website to reach their destination quickly and effectively. Supports .NET Framework 1.1, 2.0 and 3.5, ASP.NET AJAX, Visual Studio 2003, 2005 and 2008, all major browsers and XHTML standards.

Resource Specifications	
Version:	3.0
