# Google PageRank

Hits: 1,186

**Description:** What is PageRank? PageRank is a numeric value that represents how important a page is on the web. Google figures that when one page links to another page, it is effectively casting a vote for the other page. The more votes that are cast for a page, the more important the page must be. Also, the importance of the page that is casting the vote determines how important the vote itself is. Google calculates a page's importance from the votes cast for it. How important each vote is is taken into account when a page's PageRank is calculated. PageRank is Google's way of deciding a page's importance. It matters because it is one of the factors that determines a page's ranking in the search results. It isn't the only factor that Google uses to rank pages, but it is an important one. So in a word we have the code you need to check and display your pagerank.

## Resource Specifications

<b>Version:</b>	2.1
<b>Platform(s):</b>	linux, windows, freebsd, osx, sun
<b>Date Added:</b>	Jul 13th, 2007
<b>Last Updated:</b>	Sep 11th, 2007
<b>Author:</b>	Don Pearson

**Average Visitor Rating:**  **0.00** (out of 5)

Number of Ratings: 0 Votes

**Average Member Rating:**  **0.00** (out of 5)

Number of Reviews: 0 Reviews
