# FLV Watermarker

Hits: 358

**Description:** Are your videos watermarked?

Visitors watching your video should also see your domain name at the same time.

Increase your exposure if posting to Youtube

Protect your original video works with the FLV Watermarker

What are the features of the software? Single screen interface. Extremely simple interface.

You can use any color for your watermarks. You can change the Font Style and Font Size of your watermark. You can place the watermark on any position over your video. You can change the alpha (transparency) of your watermark as well!

Does not deteriorate video quality. Does not re-encode. Runs on Windows98/Me/2000/XP/
