# Paczkator - sending big scanned attachments made easy!

Hits: 629

**Description:** Features:

- \* Small, free and easy to install and use
- \* Automatically finds any images in the folder specified and scales them down if they are too big
- \* Zips the folder, opens your email application (Outlook Express by default) and creates an attachment for you.
- \* Warns you if the compressed folder is too big to send by email
- \* It's localised. Currently it speaks English and Polish
- \* No administrator privileges required to install and run
- \* No additional software required to work properly
