Nitobi Calendar

Hits: 2,413

Description: Nitobi Calendar is a lightweight, high-performance DHTML calendar picker for use in Nitobi Grid, or in stand-alone web forms. Nitobi Calendar integrates easily with any Web application and requires minimal coding and effort.

Features include:

- * Cross platform support including Java, ASP.NET, PHP, Classic ASP, and Coldfusion MX.
- * Cross browser support, including IE6+, Firefox, Mozilla 1.3+, Camino, and Netscape 7+
- * CSS-based design for easy skinning
- * Integrates easily with any web application by using the HTML declaration
- * Low file size and highly optimized code base makes Nitobi Calendar ideal for large-scale applications where component footprint is important
- * Unicode compliance make deploying to foreign-language environments a breeze

Nitobi Callout is available as part of the Nitobi Complete UI suite, <http://www.nitobi.com/products/completeui/>
