## qIWeb Directory Script - qIWebDS

Hits: 901

**Description:** New wave in web directories. qIWeb Directory Script is an innovative script offering new administrative tools for directory owners and one step submission process for directory users. The script offers optional Deep Links, Banner Rotator, Ad Placement right through Admin, meta and description Fetch, 5 Languages option, Instant Sub-category Creation, 9 Multiple Link Options for Users and optional Auto Approvals. Unique features of qIWeb are designed to attract potential users based on its fast and unique submission process which eliminates multiple data entry fields, allows creating distinctive subcategories right before submitting to them. These rare features are controlled via a powerful admin panel and many on/off functions.
