ASP RSS Message/News Scroller

Hits: 2,897

Description: Post and Manage Scrolling Messages/News to your website dynamically through database. This is very simple to use application built in ASP. You can easily add/delete scrolling messages through an admin interface which is connected to the database. The messages can be linked to any internal or external websites. See demo here:

<http://www.creativededgesigns.com>

The files need to be on web server to work.

Very well done. It is indeed very easy to use program, nice simple admin menu.
Will recommend to others.
