# Photo Shoot

Hits: 1,132

**Description:** Photo Shoot is a slideshow effect that is great for showing off photos and other graphics. The camera flash effect draws-in attention. Photo Shoot can also slow zoom-in to photos, maintaining a constant sense of movement and excitement. Absolutely no Flash skills are required to set it up and it can be easily embedded into any web-page. The image filenames are read from a simple configuration file on your website. Photo Shoot has a wide range of configuration options: colours, speeds, sounds, zooming and rotation. Images are linkable to other content on your website, or to javascript commands.

## Resource Specifications

<b>Version:</b>	1.0
<b>Platform(s):</b>	linux, windows, freebsd, osx
<b>Date Added:</b>	Jul 18th, 2007
<b>Last Updated:</b>	Jul 18th, 2007
<b>Author:</b>	Ed Smith
