# Magic Image Rotation

Hits: 6,547

**Description:** This is a very simple image rotation script. This script functions much like a slideshow, but has the added feature of allowing each image or banner to have unique links associated with them. All this is done without the need for annoying page refreshes. This script is free to use as long as the copyright notice remains unchanged and intact. I do request that you send me a link so that I may see it in use. I hope this was what you were looking for.

## Resource Specifications

<b>Version:</b>	1.0
<b>Platform(s):</b>	linux, windows, freebsd, osx, sun
<b>Date Added:</b>	Jul 31st, 2007
