nioColorfind

Hits: 576

Description: nioColorfind uses a super smooth interface to allow your users to pick HEX colors quickly and easily.

It utilizes a overlay Javascript layer which is displayed when the users presses the "pick color" button next to the form and it is almost guaranteed to work perfectly on your site.

Unlike some Javascript colorpickers nioColorfind allows access to way more than 1,000,000 colors quickly and without straining your webserver bandwidth.

nioColorfind released as 1.0 BETA and any problems or bugs that are reported will be fixed relatively quickly. It is developed by the professional web designers from nioDesign.com.

It is coded and tested to work in IE6+, Firefox 1.5+ and Opera 9+. Support for Safari and Konqueror are planned - please report any problems you experience in these browsers.

This is teh best color picker eva :D

Awsome for any site, easy to adapt and integrate and expertly coded for performance and accuracy.

I would never use any other color pciker, this has more colors (all of them!) and all the features I would ever need.

Great work!
