Krishanletter - THE text database newsletter!

Hits: 2,125

Description: Krishanletter is a newsletter software that is based on a flat text file database. You can use it on web pages that do not have access to any database like MySQL or if you don't want to use it. It follows the development of the famous Jax Newsletter, that's no longer maintained. **FEATURES:** no MySQL --- no installation --- multilingual --- personalized newsletters --- unlimited number of newsletter groups and recipients --- use as many data fields as you like --- group recipients in subgroups (manually or automatically) --- uses the CSS of your webpage --- detailed user management --- easy multilingual newsletter template system with variables --- logfiles --- no javascript at user pages, only in admincenter --- PHP4.1+ --- secure un/subscription (Double Opt-In/Out)
