APB Search

Hits: 444

Description: APB Search Pro 3.1 is a fully customizable site indexing and searching system. It has been developed to be powerful with lots of features but easy to install and use. Search script returns fast and accurate results with a 100% customizable output layout. User's search questions are written to a log file so you can learn about visitor's interests. APB Search comes with password protected control panel where you can set or modify settings of your search engine. It can be used even by webmasters with no programming experience, since there's no need to configure the scripts. Installation is fast and easy, setup wizard will guide you from the beginning till the end of installation. Setup script first creates index file where the content of your pages is saved. Running search from your site, the script looks up the searched words in the index and shows results. Index can be updated manually and/or automatically through the cron jobs.
