.NET PAD Parser

Hits: 117

Description: PAD Parser is a .NET 2.0 component, which retrieves and parses PAD (Portable Application Description) compatible content, and establish it in an object model. PAD Parser is able to retrieve PAD content by URL, file name or as a stream. With the PAD Parser you can dynamically create a PAD content in your application and save it as a PAD XML document. If you want to allow your web site visitor to upload PAD content, the PAD Parser will help you to do it easy.
