Textbook Exchange

Hits: 796

Description: This script allows students to create an account and list their books from previous semesters for sale. Other students can search through the listings by title, ISBN number or author and purchase the books they need. Yes there are other sites like Amazon and Ebay that offer similar services, but the advantage we have is that you can choose to meet the seller on campus to exchange the book (you can still have the book shipped to you). Both students benefit because you cut out the middleman. Sellers can ask more for their books than the book store offers and students get the books cheaper. In a survey we did at LSU students revealed they prefer this service to Ebay or Amazon because you do not have to wait for the book to be shipped, they would rather help out fellow students and it is more reliable. What's in it for the owner of the site? You make a commission off every sale (set by you and can be changed whenever). There is so much more to this script, visit us at UniversityTiger.com.
