## Blesta - Professional billing with a focus on productivity Hits: 2,677

**Description:** Blesta is a billing application designed to help companies productively manage and support their client base through automation. Blesta's modular system allows it to interface with nearly any third party API. The result is automatic account provisioning for nearly any type of service. Open sourced modules like cPanel, Plesk, HyperVM, DirectAdmin, BluePay, Authorize.net, Payflow Pro, Protx, Quantum, PayPal, Google Checkout, 2Checkout and more are included and you can even write your own. While designed with web hosting businesses in mind, Blesta works for nearly any one time or recurring service. Stylish PDF invoices that can be emailed or stuffed in double windowed envelopes and mailed out give your company a professional image. 30 day free trial.
