Great newsletter software, Jan 8th, 2008

Reviewed By: J.Bir

Hi,

I have installed "inwise Desktop free newsletter software" and it is just good:

- I can send emails through my PC
- They gave me 3 free templates
- The interface is just great

But the best is that i have full online statistic report!!

It is free and it is nice.

By the way - i tried some more programs like Group mail that was pretty nice but it cost 695\$ (or something like that)
