# ArMktime

Hits: 761

**Description:** This class can be used convert a date in in the Islamic calendar to a timestamp value.

It works like the PHP mktime function. It takes a list of parameters to represent the different components of a date and time in the Islamic calendar instead of the Gregorian calendar.

The class returns a timestamp integer value after converting the date.

This class is part of Khaled Al-Shamaa project for PHP and Arabic language:  
<http://www.al-shamaa.com/php/arabic/>

## Resource Specifications

<b>Version:</b>	1.0
<b>Platform(s):</b>	linux, windows
<b>Date Added:</b>	Sep 19th, 2007
<b>Last Updated:</b>	Sep 19th, 2007
<b>Author:</b>	Khaled Al-Shamaa
