Freshfield - Drawing Register

Hits: 281

Description: Our drawing register is a complete system for managing and distributing electronic copies of your drawings, whether you have 300 drawings or 3000 drawings. Our register can store any type of electronic file such as dwg, tif, pdf, bmp, jpg etc. Once uploaded it can be revised using the revision system, which tracks and controls change requests and the approval of the changes. The drawings can be sent out to predefined recipients via email automatically, or printed and sent via other means. A list is maintained so you know exactly who got what, when and why. The features of the current version are;

- Insert drawings with number, title, author, revision and status
- Easily revise drawings keeping history of revisions
- Submit detailed change requests requiring electronic approval
- Individual user security & complete audit log
- Create Transmittals for electronic or hard copy distribution

Demo Available

Resource Specifications
