I was getting spammed on my website form and did not know enough about stopping the unwanted junk mail I was getting. I also did not want to be without a contact form on my site. Formsmarts gave me an easy fix. It was simple to set up and I am getting the contacts that are important and the spam has stopped.

No other form providers were as straightforward with their setup. The form works in the first attempt after installation, just what you need when you are looking for a fast solution. More efficient than other forms which require extra amount of time.
