# A71BackUp - Perform a full or partial web backup with mysql db Hits: 958

**Description:** Simple, fast and efficient php script which performs a full web backup or a partial web backup when it's in a subdir of your web site. The file created is a tar archive that you can download during the backup, at the end of the backup the tar archive will be deleted. The script is protected by password that you can change as you want. You can select the type of backup in the control panel. You can decide to perform also a backup of mysql database (optional). This script excludes symlink for obvious reasons.

## Resource Specifications
