# Dreamweaver PHP Forms Toolbar

Hits: 669

**Description:** This package of Dreamweaver extensions make easy the validation, security and processing of forms, including some cool effects. The extensions included are a javascript-based form validator, auto-calculated fields, related (linked) select lists, control check boxes, and PHP-based form to mail, form to excel, captcha security fields, and upload in background fields. This package is supported by Dreamweaver MX and later versions, including all the newest Dreamweaver versions.
