iShop 2.15

Hits: 4,125

Description: Not just a online Shop. This shop provides a lot of useful features to help improve customer experience and SEO(search engine optimization)! Some of the features are: custom filters for each category, no obligation of registering accounts, though accounts are available and all orders are added into users account based on email address used, download area for drivers and other features, multi language support (admin can select language for website), auto scaling (resizing) of product images, thumbnail generation, TPL template support ... and more.
