VGPanel - Video Game CMS

Hits: 735

Description: VGPanel is a state of the art powerful Video game Content Management System, created by the Co-Admin and Lead Editor of www.consolemonster.com. The unencrypted CMS allows those with small budgets but big ambitions to create a video game fansite without having to blast out thousands of \$\$ on a custom made CMS. There is no encryption on the system, allowing developers to dive into the PHP code and edit it as they please. Those with little PHP knowledge can still take full advantage of the powerful customisation tools available within the script.

Constant updates, modules and support is provided by the CMS developers, as well as other users.
