PHP Melody - Music Video CMS

Hits: 8,351

Description: *** Video sites are the most powerful and easy way to bring traffic ***

PHP Melody 1.4 is the answer for anyone looking to establish their own music video community. It comes with a massive database of over 3,300 music videos to help you get started right way.

The build-in user area allows your visitors to register, post comments, suggest new videos, keep a list of their favorite videos and much more. Some other new features in 1.4 include: SEO Friendly links, UTF-8 compatible, description or lyrics, Banner manager, extra security and a huge database of videos (over 3,300). You can choose to include PHP Melody into your existing site, thanks to the Smarty template engine.

If this sounds good so far, wait till you see what we have waiting for you. We guarantee you'll love the new PHP Melody 1.4.1

5 out of 5 stars, Nov 4th, 2007

Reviewed By: WoWRoller

This script is basically everything I wanted in a video script. I mostly enjoy having the video importing tool and the feel of the admin area. It must be one of the most user-friendly products with clean code and not to mention the flawless installation process. There were no problems with the installation and i had the site up and running in less than 20 minutes. I strongly recommend Andrew and his team and I give PHP Melody a rating of 5 out of 5 stars.

Impressed !!, Feb 1st, 2008

This must be the best purchase i've made in all of 2007. The thing i value most is the support reply time. I don't think i've ever waited for a reply for more than 2 hours.

I don't know much about php and the video tutorials helped me a lot with the installation.

I strongly recommend this product to anyone looking to start a video site or add videos to an existing site.

An excelent product with many purposes, Feb 8th, 2008

I love PHP Melody because it has a clean code and everything makes sense. The PHPSugar team have done a proper job and this product has everything i needed: members area, dynamic pages, template system and the possibility to import videos with minimum effort.

The support team is great and their open forums contain a lot of valuable info.

Fantastic appliction, amazing support!, Feb 13th, 2008

First of all let me say that I'm not used to posting reviews about products however i really had to write on for php melody. The installation went flawlessly and I was glad to see that everything was working. PHPMelody is well documented and support always goes the extra mile to help you. I was very impressed to see that they have a community that supports this product. If you're looking for a solid product with plenty features I strongly recommend PHP Melody. The price is also excellent.

Exceeded my expectations, Feb 21st, 2008

I must say that I was a bit skeptical of what this product can do because of the reasonably low price tag. I went ahead an purchase a copy of PHP Melody for one of my Romanian lyrics sites. The product was delivered right after I finished my order with well written documentation and additional tutorials. Translating it was easy and I got a lot of help from their community/forums. Andrew is a great guy and was very prompt. He also provided great tips and strategies to get traffic. I love it!:)

Good price, nice people!, Mar 10th, 2008

I have tested many video scripts from Hotscripts.com for my new project. I decided to go with PHP Melody because I was happy with the pricing and the free updates which are very important to me. However, by far the best reason to buy PHP Melody is for the professionalism of the quick-to-act support team and the community.

Much better than others, Apr 11th, 2008

After testing countless other video content systems, this by far trumps all of them in value and features! The high quality comes through right at the easy installation process, but by far the best reason to buy PHPMelody is for the professionalism of the quick-to-act support team and the community.
