# WWC Notify

Hits: 1,874

**Description:** A simple but powerful script which allows users to add themselves to any number of mailing lists. The one script handles them all. Includes features such as email format verification, name require, message personalization and so much more. Allows custom script headers and footers to ensure the script blends with your site's look seamlessly. Customized links to allow easy unsub for each individual. Generation of online form in which you type the message that you want to send, hit send, and it gets sent to all on the list. You can define a set subject and footer to be included in every message sent.
