As a recent and unhappy customer of ABK-SOFT, the makers of AbleDating and AbleSpace software, I have documented my technical and customer service experience with them as a warning to other buyers. Unfortunately, it is lengthy so I created a website for the review complete with support documentation:

The Mixer script is one of the best I have seen , in terms of features and appearance , though this is my first dating site.The guys from ABK-Soft made use of the advanced AJAX-Based technology for their software .The browsing is so fast and smooth, one can really feel it. I`m really amazed at the work that they have done and still doing!
