Ravinder 1.0 CRM

Hits: 952

Description: Ravinder is a unique applicant tracking system and recruitment tool to publish jobs on a website and allow candidates to upload cv and personal data. Ravinder schedules interviews and has a built in meeting room planner. It also has an event diary per user to keep track of forthcoming events. The powerful meeting room planner allows the swapping and moving of interviews in a touch of a button and a graphical overview per week. Manage contacts, allow external employers, agents to post jobs. Admin Panel to setup in around 5 minutes. System requirements are PHP/MySql or you can opt for our fully managed secure hosted version.
