Click Conversion Tracking of Pay Per Click PPC, Search Engines and Links

Hits: 823

Description: Covert Conversion Pro (CCP) tracks ALL of your marketing activities that are generating traffic and sales- whether these are for the promotion of your own products or affiliate programs including: 1) Pay Per Click PPC: Google Adwords, Yahoo Search Marketing and MSN Adcenter, 2) Organic traffic from search engines, 3) Other environments: Email, Ezine, Text Link Ad, Signature, Forums, Videos and Blogs. For PPC and search engines, CCP tracks the keywords that generate traffic and sales so you can optimize your PPC campaigns and your landing/sales pages. For other environments, you can do click conversion tracking of a link displayed in a particular environment e.g., email. In brief, CCP allows click conversion tracking of keywords or environment so you can optimize your whole traffic generation and traffic conversion strategies. The script is affordable but has ALL the features of other popular but expensive scripts in the market. Your purchase back by 30 day money back guarantee.

Resource Specifications

Version:	1.01
