FS mailing list manager and Email Marketing solution

Hits: 5,323

Description: FS Mailing List Manager is the ultimate tool for sending professional newsletters to your subscribers. It is so great that we guarantee it is the best list manager you could have ever wished for. Some of the key features include: Email Templates • Newsletter Editor • Advanced reports and charts to Track and Analyze your campaign results • A scheduler to Send your weekly/monthly newsletters on time • Subscription form builder • Detailed message personalization • Bounced email filtering (Rids lists of invalid email addresses) • Ability to send multiple attachments with each message • Unlimited number of subscribers and mailing lists • Ability to send text/HTML messages • Customizable appearance,And much more!

Unlike many other similar tools, which are usually double the price for the same (or fewer) features, FS Mailer is affordable! Try our free demo or watch our video to see why so many users choose FS Mailer for their email campaigns.

This program was exactly what I was looking for to start a mailing campaign, in few minutes I used the editor to create a personalized newsletter with images and attachments and never faced any problem sending it to more than 2500 subscribers, the support also was great, I think separating the draft from the sent messages and ability to add the date in the newsletter would be nice feature to add, I hope you consider that soon!

Powerful, easy to use and very affordable, Nov 22nd, 2007

I do wish to pass on my thanks for your great program. it really helps me on sending monthly newsletter to my clients, the only thing that was missing in ver1 is a scheduler to be able to send messages automatically at specific dates (begining of each month in my case), now this feature is existed in version 2.0 along with more reports and charts to analyze the results of each compaign, updating to this new version was totally free and the support was incredible as usual.

Great Mailing App, Feb 13th, 2008

FastSender is by far the best and most affordable mailing (solution) programme out there. The intial setup was a breeze. It has a very clean look. Very user friendly in walking you step by step from setting it up on your server to managing the members database to sending out the newsletter.

Taking into consideration of how ISPs limit the number of e-mails going out at any one given time (and in some cases, violating that number got some people I know blocked), FastSender allows you to specify h
