## IIS-IP-block

Hits: 273

**Description:** This script uses a custom 404 page that logs the IP address and amount of times it has loaded the 404\_error.pl .If someone loads the 404 page 3 times in succession their IP address is logged to the banned\_ip\_list.log file. Every 60 seconds build\_deny\_list.pl opens the banned\_ip\_list.log file and gets the IP address to block. It then generates some C# code, adds that banned IP to the C sharp code, compiles the C code into an executable binary. This C sharp program is actually what adds the IP to the IIS deny list. After the build\_deny\_list.pl generates and executes the binary, it deletes the original source and executable file.

Resource Specifications	
Version:	1.2
Platform(s):	windows
Date Added:	Nov 14th, 2007
Last Updated:	Nov 14th, 2007
