# nsAuthenticator (LDAP/Active Directory Authentication) by NetSnips.com

Hits: 411

**Description:** Database Integrated Active Directory Authentication Script. This software allows you to use Forms Authentication to provide user credentials (instead of the default "windows authorization" pop-up window). Once LDAP / Active Directory authentication is obtained, the information is matched to a database entry providing authorized level access information. This script is fully customizable to integrate into your environments. LDAP / Active Directory Authentication Microsoft SQL Server Integration MSDE Database Integration ASP.NET / Visual Basic Source Code SQL Script for Database setup also included.
