Miniweb 2.0 Job Board

Hits: 2,056

Description: Miniweb 2.0 Job Board is designed for use by a company to manage its job openings and applications, which are commonly called "Careers" section on the Web site. A hiring manager or HR recruiter can post jobs, receive applicant information, and manage resumes online. Think of it as a mini applicant tracking system, as popularized by Resumix and RecruitSoft. Miniweb 2.0 Job Board is best use by small businesses as they cannot afford the high-end applicant tracking systems. The benefits of using Miniweb 2.0 Job Board includes easier management of job openings, candidates, and resumes. It also helps to project a professional image. Please see the demo for more information.
