Free Calendar

Hits: 1,140

Description: When you create a calendar you need to copy a single line of HTML code and then put it on your web page. Edit your calendar events and options via own password protected administration page. There is no need to update your pages. You can use the calendar on ANY web page - HTML, HTM, PHP, ASP, CGI, PL, JSP ... and other valid html based web page. Free Brolmo Calendar has been tested on almost every browser - Internet Explorer, Mozilla, Netscape, Opera and few more not that popular with JavaScript support. You can have as many calendars as you want. You can use your calendars on all your website and pages. You can have multiple calendars on the same web page or website, for Free.
