## actiTIME v1.5

Hits: 728

**Description:** actiTIME is a free time-tracking software for effective management and billing in small and mid-sized companies.

Being a web based timesheet actiTIME is easy to access from any office computer. With this software you can collect time expenses for each particular customer and project and generate reports. Moreover, actiTIME supports UTF-8 character set so you can enter data in other languages besides English.

Each actiTIME user is granted individual access rights and one of these allows the manager to enter and modify time-track of other users. Keeping track of over- and undertime and analyzing employees' performance is simple with this timesheet.

actiTIME also helps you bill your customers: it supports both billable and non-billable tasks and allows data export to QuickBooks. actiTIME helps to streamline daily work routine and avoid all-out efforts.

You can get full-functional version of this time-tracking software at no charge.

Most recent proof I got when we used actiTIME CSV reports as a source for preparing a list of all processes and calculation of the % hours spent per task. It was quite eye opening as to what % of the manager and staff days was spent on what tasks.

**Very impressive time tracker**, Mar 25th, 2008

We are very impressed with the product and have found that it matches our business process very well. We are seriously considering it to replace our old in-house system. The interface is simple, intuitive and with a very professional look and feel. The features that we were looking for are: web-based, relational database back-end, hours-based time entry and one week per view - actiTIME has all of them and much more.

**actiTIME is an absolutely brilliant application**, Mar 26th, 2008
