HTTP Header Check Tool

Hits: 565

Description: Find out what headers are returned for any webpage. This tool also available for download. Often web pages can return unexpected values such 301 (permanent redirect), 302 (temporary redirect), or 404 (page not found), even though everything "appears" to be okay. This tool can help you find out the headers, and hopefully your pages will be 200 (Ok).

Resource Specifications

Version:	1.0
Platform(s):	linux, windows, freebsd, osx, sun
