DynamicPDF Generator for COM/ActiveX Hits: 429

Description: DynamicPDF Generator for COM/ActiveX is third generation highly efficient COM/ActiveX component used for the generation of PDF documents based on dynamic data. PDF documents can be generated to a file, byte array or directly to IIS's output stream. The component is thread safe and designed to run efficiently in a high volume web environment as well as client based applications. The object model is intuitive and easy to learn, yet at the same time is very powerful.
