iLister - SEO-Friendly Classifieds Software

Hits: 6,363

Description: iLister is an all-purpose SEO-optimized multi-language platform for creating classifieds websites of ANY kind. Get the ability to translate the entire website into several languages! Internationalization module allows users to switch between languages on the fly. Fully customizable code and look & feel offer endless possibilities to create your own unique website: create categories and subcategories for cars, realty, scripts, jobs, personals, pets, electronics, clothing, etc. Quickly generate and set common or unique templates for each category. Import/export of language files. Website-wide keyword search or advanced search within categories, browse by function. Setup user groups with different profiles; multiple pay-per-ad or subscription plans. Several payment options are built into iLister, incl. 2CO, Paypal and Authorize.NET. Download and install iLister on your server or view online DEMO.

I ordered this script expecting to have to make substantial modifications. I wanted to focus in on a specific market. It came easy with this well-design script. It is easily customizable for a quite new look and feel. The WorksForWeb team was helpful, prompt, and effective. I consider them an active asset that can be counted on to meet our customers needs and the demands of our industry.

Well Done Software!, Feb 20th, 2008

I tried many PHP classifieds scripts and iLister seems to be one of the best. The script is very comprehensive and can be easily customized for any specific needs and markets. Thanks for the support team - they are always ready to help!

Thumbs up!, Feb 28th, 2008

I like iLister better than many other classifieds scripts out there. Special version is as good as the standard and support is always ready to help. SEO-friendly stuff rules! Looking forward for the multilanguage version :)
